

Registration

Adventures in Kindergarten is a fee-based program of \$610 for the four week program. The program does not allow for reduced rates for students not planning on attending the entire four weeks.

Students may attend either location regardless of their home school.

More complete summer program registration information can be found online, including course offerings and registration details and guidelines. Summer registration begins online on April 16 at 9:00 am, www.pvpss.com.

Summer Kindergarten Program

The Summer Break **Adventures In Kindergarten** Program will provide an enriched environment where children will be encouraged to explore, manipulate, create, dismantle and reconstruct things together. This class will focus on the intellectual, physical, social and creative development of children.

Instructional strategies will focus upon a “hands on” challenging approach that will encourage curiosity, active learning activities, and early literacy development. The literacy component will be integrated with science, mathematics, music and fine arts. Children will be exposed to all areas of the curriculum including using technology through 21st Century learning skills.

Adventures in Kindergarten will articulate closely with the Palos Verdes Peninsula Unified School District’s Kindergarten curriculum. This will allow for a smooth transition as the student moves forward into TK or Kindergarten. The program is available to any student who will attend a kindergarten or transitional kindergarten program in the fall.

What to Expect

Each **Adventures in Kindergarten** class will strive for a maximum of 22 students with a fully credentialed, highly qualified, enthusiastic, energetic and experienced kindergarten teacher.

The teacher will:

- provide a literacy rich environment with daily activities including phonemic awareness and guided reading and writing practice.
- integrate the District adopted CGI mathematics program with focus on number recognition and application.
- encourage creativity, imagination and curiosity through daily art activities that correlate with a summer theme.
- provide child-centered physical education activities and a recess period designed to foster the development of team building and social skills.
- guide students in the use of technology using iPads to broaden their access to information and support reading instruction.
- involve students in STEM (science, technology, engineering, mathematics) related activities designed to enhance their awareness of real life experiences.
- provide daily email communication with parents regarding classroom activities and opportunities for reinforcement of skills and concepts covered.
